

Our Speech-Language Therapists, Occupational Therapists, Physiotherapists, & Behaviour Analysts typically support children and youth with:

- Autism
- Developmental Delays in Speech, Fine and Gross Motor Skills
- Coordination Disorders
- Down Syndrome and Genetic Disorders
- Intellectual Disabilities
- FASD
- ADHD and Executive Functioning
- Brain Injuries and Cerebral palsy
- Trauma

Who We Are

Our occupational, physiotherapy, speech-language & behaviour analysts teams are trained to work with children of all ages in their homes, communities and schools. Culturally relevant, individualized treatment plans are created with families, daycares, preschools, and school teams to ensure the child's full circle of care is included in interventions.

Providing culturally relevant & consistent Speech-Language Therapy, Occupational Therapy, Physiotherapy services, & Behaviour Analysts to communities in Northern BC
